

Blue Letter Bible

Inline Interlinear

Role
UX/Web Designer

Date
January 2025

The heart of this project was to create an online version of an inline interlinear. An inline interlinear displays the original Bible language text (Hebrew or Greek) word-for-word alongside an English translation. My goal was to organize the data in meaningful ways and allow users to customize how they view that data.

Whenever I create new features, I mock up designs in Figma, iterate, and once approved I start coding in HTML and CSS then handoff to an in-house developer who connects the data to the design.

This new tool has become one of the most popular ways to interact with the original Biblical languages. This tool averages **186,000 pageviews** per month from users.

Blue Letter Bible

BLB Institute (study.bible)

Role
UX/Web Designer

Date
September 2019

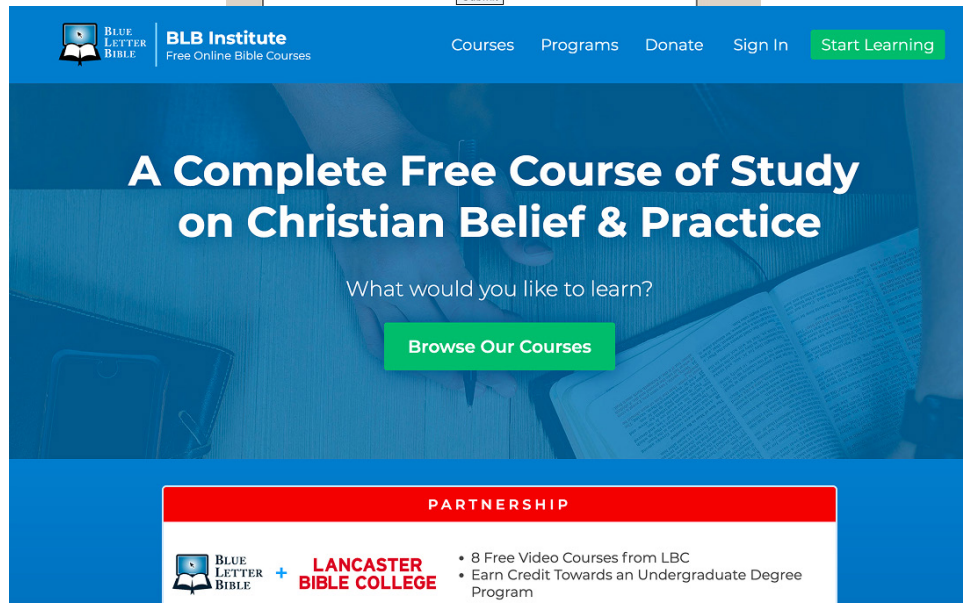

Original

Blue Letter Bible Institute was in desperate need of a design update. Our goal was to completely redesign BLBi with fresh visuals and create an improved user experience. I was tasked with modernizing the original 1990s design.

I built desktop and mobile wireframes along with hi-fidelity mockups originally in Sketch and then migrated those designs to Figma. I also coded much of the HTML and CSS.

After the redesign, the number of unique users on BLBi **increased by 77%**. Users write in on the message boards about how much they appreciate this updated resource.

Blue Letter Bible Annual Wall Calendars

Role
Art Director/Designer

Date
Various

I had the privilege of art directing and designing annual Blue Letter Bible wall calendars that are mailed out as a donor gifts. I worked on optimizing the calendar template to include plenty of space to write on, standard and religious holidays, and moon phases. These calendars are popular with donors and the ministry sends out **over 4,000+ a year**.

Blue Letter Bible 30th Anniversary Event

Role
Art Director/Designer

Date
March 2026

Created event branding materials for Blue Letter Bible’s 30th anniversary events this year. Designed items including invitations, banners, programs, signage, and presentation slide decks to help make the event cohesive visually. A successful first event happened in California with 150 guests—a second event will be in South Carolina later this year.

Event Invitation

Retractable Banners

Remove cover and battery case.

Remove cover from assembly sliding cover up and off, see figure 3.

Remove the battery case from interior assembly by lifting the case up and out and set aside, see figure 4.

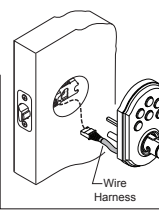

Important before proceeding:

1. Verify that position #2 of the "Settings Switch" is in the OFF position. (Refer to section 11.)
2. Work with the door open (away from jamb) to avoid accidental lock out.

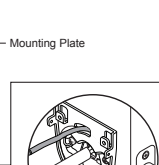

Install Exterior Assembly.

Place the exterior assembly flush onto door, adding the wire harness under the latch.

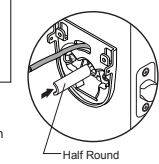

Install Interior Mounting plate.

Route the connector of the wire harness through the slot at top of mounting plate. Insert the long screws to engage exterior assembly. Tighten screws to secure assembly. Tighten screws to secure mounting sure that both the plate and the exterior assembly are flush against the door vertically aligned with the edge of door.

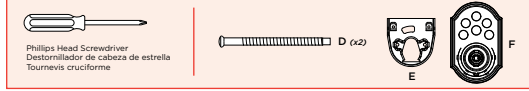

Install the half round spindle.

Insert the half round spindle through the latch hole - to engage with the exterior assembly.

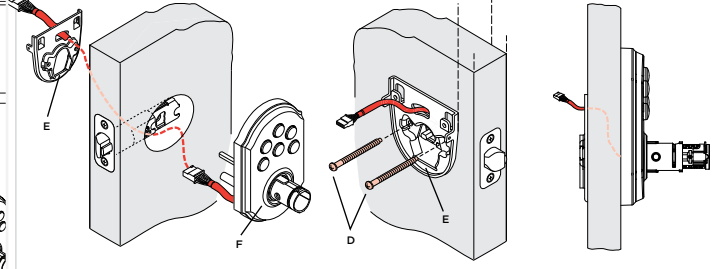

3. Install Exterior Keypad & Interior Mounting Plate
Instale el teclado numérico exterior y la placa de montaje interior
Installer le clavier extérieur et la plaque de montage intérieure

Phillips Head Screwdriver
Destornillador de cabeza de estrella
Tournevis cruciforme

Update

With this project, I had the opportunity to clarify and improve the installation experience for Kwikset SmartCode customers.

One of the biggest improvements made was adding in the tools and parts needed for each step and establishing a clear visual hierarchy through type and color. As a result of this redesign, product return rates **reduced from 35% to 22%** and improved customer satisfaction.
